

*Modify and validate an XER file from an outside source prior to importing it into your Primavera P6 database.*

# P6-Scrubber v3 – Import XERs with Ease

## THE CHALLENGE

Importing project XERs can wreak havoc with your P6 database and your corporate standards for dashboards and reporting. But with projects teams all around the world with their own P6 coding structures, it is hard to avoid polluting your P6 system. How do you make sure you're not importing junk or old information?

## THE SOLUTION

Emerald's P6-Scrubber® will make this problem go away. This new tool built by Emerald Associates gives you control to manage data from imports by allowing you to keep, remap, and clean data at the Project, WBS, and Activity levels. Global data, such as Calendars, Cost Accounts, Roles, and Resources can also be controlled by the tool. We take advantage of our existing P6-QA and P6-Calculator tools to flag and report on what P6-Scrubber did in importing so the team

can give contractors feedback against standards with only minutes of effort and not hours.

## THE BENEFITS

Emerald's P6-Scrubber can significantly reduce the time you spend on giving feedback to your contractors without manual quality assurance. It is easy and fast to set up and save new Scrubber Definitions to use over and over with each different client. P6-Scrubber produces a report and also automatically flags what it did so when you import, it is easy to see right in P6 what was done during the scrub. The tool will help keep your database clean, and you will avoid importing data with missing or incorrect details.

### EASY, FLEXIBLE & SECURE

- Web-based, easy to learn and use
- In the cloud or on-premise (coming soon)
- Prevents global data from being imported unnecessarily
- Definitions can be shared to specific teams so those definitions will only be seen/edited by those users

### SAVES TIME

- Keep, clean, and remap data using the data already in the XER through the import feature
- No need for working in time consuming scrubbing databases
- Definitions can be saved, shared, and used over and over

### SAVES MONEY

- Cleanup XERs in minutes instead of hours
- Provide feedback to clients to help clean-up their schedules prior to sending
- Helps avoid precious and costly time cleaning up your production database

### USER COMMENTS

*"The tool has great versatility on changing the schedule to customize to the owner's format requirements. I was very interested in the capability of rolling down the Global Calendars. The tool works great for me. The HTML reports are very detailed and informative. I used the tool to demote the calendars and to scrub the schedules ."*

**Senior Specialist, Large Oil and Gas Company in Alberta, Canada**

### WHAT'S NEW – V3

- All new user interface
- Ability to save Scrubber Definitions to be used as templates
- New user management with the ability to define Teams within the company and share scrubber definitions
- Many new scrubbing modules including Calendar, Resource, Role and Units of Measure remapping
- Ability to import XER files to auto generate scrubber definitions
- Comprehensive scrubbing report clearly showing changes which were applied

**Emerald also offers add-ons and loader solutions for Unifier, Prime, Aconex and Primavera Contract Management.**

### TECHNICAL SPECS (ON-PREMISE)

- Current Release: Cloud-based
- Future Release: Option of on-premise with active P6 connection as well as cloud-based
- Modern web UI framework
