

Are your project delivery methods addressing real needs, goals and return on investment?

EMERALD'S PCM ROLLOUT PROGRAM

With the experience working with numerous organizations in various stages of project management growth, Emerald has developed a standardized rollout program for Oracle|Primavera Contract Management. The rollout program is flexible to allow for an organization wide or site by site transition roadmap tailored to your organization's specific challenges and priorities. The customized roadmap provides the opportunity to quickly leverage your software investment while meeting your corporate goals, all within a timeline that is sensitive to ongoing operations.

Oracle | Primavera Contract Management (PCM) Implementation & Support Program

THE CHALLENGE

Organizations dealing with multi-project environments or projects with several phases or sub-contractors should consider the world leading Oracle|Primavera Contract Management product solution. This tool gives you a true multi-user, multi-project, templated environment where procurement, contracting, document control, site management and overall project management teams can truly collaborate internally and externally through an easy to use web based solution. Oracle|Primavera Contract Management has delivered results on projects worth over a trillion dollars worldwide over the last 25 years.

Emerald has successfully assisted our clients with implementing, adapting and integrating Contract Management (formerly Expedition) since 1992. We have developed standardized work processes for contract management, document management, change management, cost control, work package controls and AFE tracking systems. Our enterprise clients face challenges of differing project types and scales with projects ranging from several thousand to multi-billion dollar budgets. Other challenges include international team delivery logistics coordination, geographical requirements, different languages and currency tracking needs.

Our solutions are based on streamlined, integrated, scalable solutions that deliver immediate value to your team and visibility to the organization. For example, Emerald has upload solutions that allow for the minimization of data entry and integration of any level contractor into the collaborative process. Our solution kit will ensure you attract and retain the most talented and skilled professionals in today's competitive marketplace.

IMPLEMENTATION METHODOLOGY

Emerald's implementation methodology focuses on identifying the types of projects underway, the processes being used and where improvements can be made to achieve our client's tactical and strategic project delivery goals. Our focus is to embed technology based solutions that integrate with existing technology to maximize cross-functional team output. Through our proven hands-on approach, our specialists work with your core team to develop and customize Primavera Contract Management to meet procurement, contracting, cost and document control needs at both the project and corporate level.

Our methods will eliminate potential work-flow bottle necks, and identify integration/streamlining possibilities that can be achieved through standardized/templated project and process delivery.

The key areas reviewed include:

- **Project Standardization and Templating Possibilities**
- **Internal, External and Program Reporting Requirements**
- **Cost Management Requirements**
- **Scope Change Management Processes**
- **Issue Identification and Claims Mitigation Strategies**
- **Document Review Workflow Streamlining**
- **Integration/Streamlining with other Corporate Systems**

- Multinational Oil & Gas
- Biotech
- Health Care
- Discrete Manufacturing
- Energy Performance
- Heavy Civil/Mining
- EPCM firms
- Engineering and Construction
- Heavy Civil Construction
- Municipal, Provincial and Federal Infrastructure

Enhancements, Emerald Tools, Integrations

PCM ENHANCEMENTS

- Multi-Currency Contract Line Item enhancements
- Variable Tax enhancements
- Contract Line/Change Order Merging enhancements
- Contract Closeout enhancements
- Emerald Complex Report and Form Libraries

ADD-ON TOOLS & UTILITIES

- Filtered Replication Security and Remote Site Access Add-on
- Emerald Vendor Remap Utility
- Document Auto PDF and Attachment add-on
- EP-dashboard toolkit for Contract Management
- Oracle User Productivity Kit Expert Hosted Training for PCM (v14+)
- Excel-Contract Management Loader Tool (v12+)
- Emerald P6-PCM multi-project Easy Integration

INTEGRATIONS

- Oracle E-Business
- SAP
- Livelihood
- Discovery
- P6-EPPM
- PRISM
- Timberline Accounting

HOSTING & SUPPORT

Emerald offers a Canadian based, fully hosted, implementation model for clients who don't want to deal with the infrastructure of PCM. We can also offer PCM on a SAAS model. We provide first, second or third tier support for our clients, saving our clients the cost of dedicated support resources for PCM. We can work with your existing support infrastructure to ensure a seamless experience for the diverse user community.
