

# Oracle's User Productivity Kit

**ORACLE** Platinum Partner

Is your project team training as effective as it can be?

## THE CHALLENGE

In today's fast-paced project management environment, keeping your widely dispersed, highly skilled, and very expensive project team up-to-date on new software tools and changing business processes can be incredibly time consuming and unproductive. However, the hidden cost of inefficient training is much higher when frustrated team members move on, bringing high turnover and significant re-work due to lack of clarity in processes and procedures.

## THE SOLUTION

Oracle's User Productivity Kit® (UPK) is an interactive content development platform that enables worldwide project teams to develop, deploy, and maintain their own corporate or project specific training material in a cost effective, time sensitive manner. Internal modular cross platform curriculums can be built to include tutorials, system processes, interactive simulations, training manuals, presentations, and tests to ensure learning is evaluated prior to execution. The learning content can be integrated directly into the Oracle software tools to which it applies (and many others that allow corporate specific help menus), making it easy for everyone to use on the fly.

## THE BENEFIT

- Team members consume training content at their own pace, whenever necessary which improves learning effectiveness
- Team retention is improved with access to multiple learning styles and better training programs
- Team members are better equipped to deal with issues which translates into reduced frustration and less time wasted waiting for others to troubleshoot
- Reduce travel costs for site and remote training
- Mitigate compliance risk with trained team members that follow process steps
- Increase productivity and encourage quicker adoption of new processes
- Go green by reducing printing of training manuals

## PRODUCT HIGHLIGHTS

### User Friendly

- Access web-based UPK content at anytime from anywhere
- Deliver training content directly within the Oracle applications

### Saves Time

- Create and edit content in minutes with the Recording Wizard
- Take advantage of multiple learning methods
- Develop tests and curriculum ensuring training occurs before execution

### Saves Money

- Centralize deployment of standardized content
- Learn from anywhere at anytime
- Multi-language translation

## EMERALD UPK ENHANCEMENTS

- P6-EPPM v8.2
- P6-PPM v8.2
- Oracle Primavera Portfolio Management OPPM v.9
- Primavera Contract Management PCM v14
- EP-dashboard how-to
- Extra lessons for P6/PCM how-to
- P6-EPPM Admin Training
- PCM Admin Training
- Scheduler Curriculum
- Contract Administrator Curriculum
- Turnaround Scheduler Curriculum
- Emerald T-100 Course

## THE PARTNER

As Oracle's only Canadian Primavera Platinum Partner and expert in project management solutions, Emerald Associates can jump start your UPK implementation. From needs assessment to roll-out and training, we will help make sure your project team gets the most out of the UPK. We can also help your team develop an effective training curriculum and final materials for any of the project management solutions we deliver.

In addition, Emerald Associates offers a hosted model for UPK that gets your team access to your specific learning material as well as Emerald built material, giving you quick deployment and access to maintained and up-to-date learning material. Let us host your UPK environment and maintain your content on our servers, so you can focus on productivity and reap the rewards of greater efficiency.

## TECHNICAL SPECS

### Server:

- Windows 2003 server or 2008
- Oracle Database v10.2, v11.1 or 11.2 – OR—Microsoft SQL Server 2008 or SQL Server 2012

### User installs:

- Windows XP Professional, or Windows 7
- Microsoft Word 2007 or 2010
- Internet Explorer 8.0, or 9.0; Or Mozilla Firefox 10.x or 14; or Apple Safari 5.0 or 5.1
